Apartments

Beekstraße 36 combines residential and commercial uses in a traffic-calmed city-centre location. The existing building features a rear extension, an elevator and a central staircase. Information is taken from the original project teaser.

A balanced space mix.

The original documentation states 342 m² of residential space and 340 m² of commercial space, plus another 75 m² of usable area. Areas have not been independently verified.

At the heart of the city.

According to the project documentation, the property stands in historic central Duisburg, in a traffic-calmed area surrounded by residential, retail, office and public uses.

Four apartments. Multiple perspectives.

Three apartments of 90 m² each and one of 72 m² are stated. The second-floor apartment is described as having a roof terrace over the rear extension.
